

A 3D architectural rendering of a modern backyard. In the foreground, a rectangular swimming pool with blue water is visible, surrounded by a light-colored concrete deck. To the right, a covered patio area features a striped lounge chair and a small table. In the background, a modern house with large glass windows and a brown roof is partially visible. The scene is set against a backdrop of a dense forest under a clear sky.

L.A. PLANTS

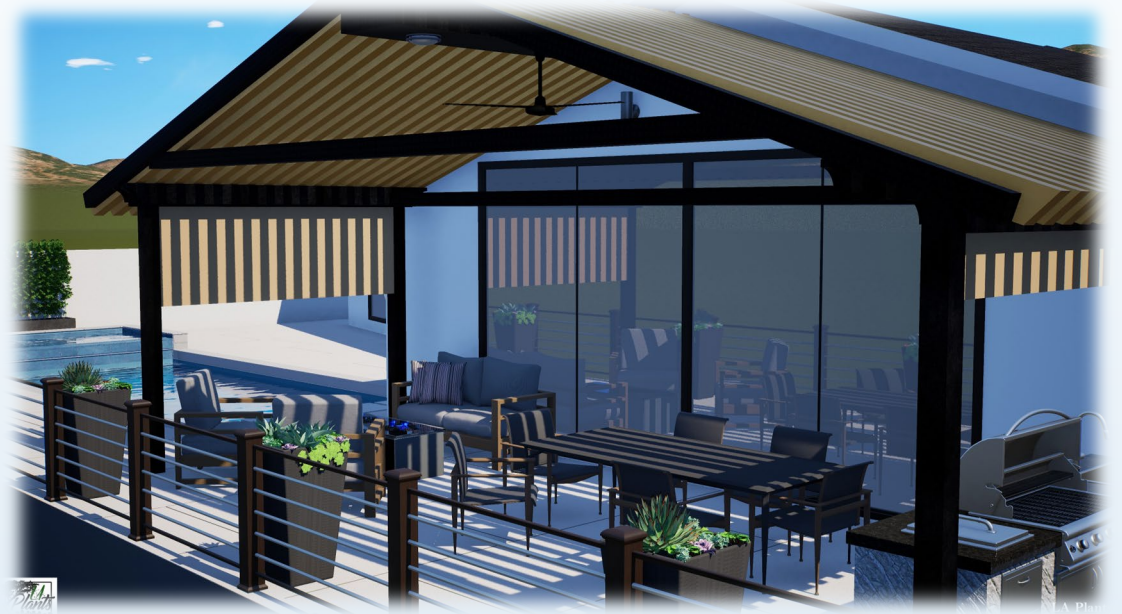

3D Landscape Designs

www.LAPlants.com

Welcome to your 3D Landscape experience

Thank you for your interest in L.A. Plants 3D Design.

Our 3D design will make it easy to visualize how you can use your outdoor space once the design is completed. The 3D experience will give you peace of mind, and confidence that the end project will meet your expectations.

L.A. Plants offers a distinct and immersive 3D rendering experience. This 3D perspective will help you visualize how you'll use your outdoor space once it is finished.

The 3D experience will transport you to your new patio area, sitting by the new fire pit, cooking in the new outdoor kitchen, and giving you a birds-eye view of the entire project. Our 3D design will give you peace of mind and confidence that the finished project will meet your expectations.

Rendering Project starting at \$1800 based on SQFT.

Design Process

We consider the need for sunlight, irrigation, and maintenance in every design. As the design process

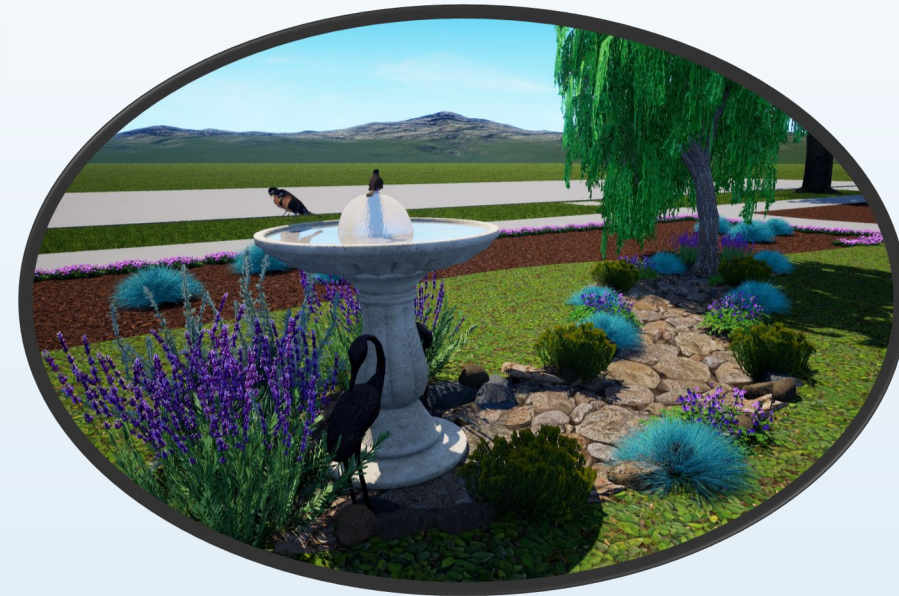

progresses, we will create a site plan based on your tastes, style, sunlight, watering, and budget.

Create photos

rendered using 3D technology to bring your designs to life. This will give you an idea of what your project will look

like before we start construction. This process is convenient, uncomplicated, and efficient.

Check out the general design process below.

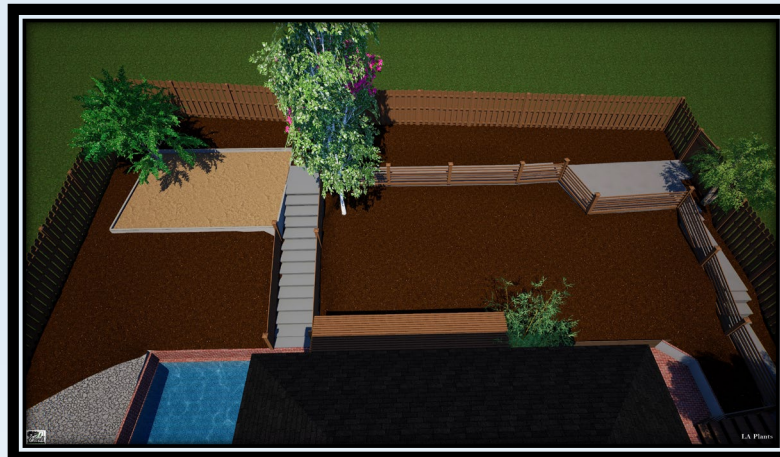

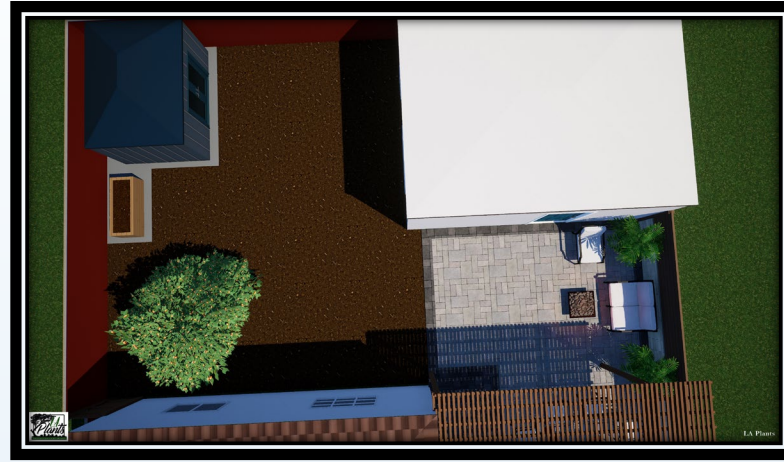

We have 3 phases for our 3D Design:

Phase 1:

We start with a home consultation with one of our landscape professionals. At this point, we listen to your input, make recommendations, and determine a budget and wish list for the project. Once we have gathered all the necessary information, we will collect location measurements and photos.

We will then create the home structure for us to design your new landscape.

- (Before data collection can begin, a 50% payment for the design package is required along with a signed agreement.)

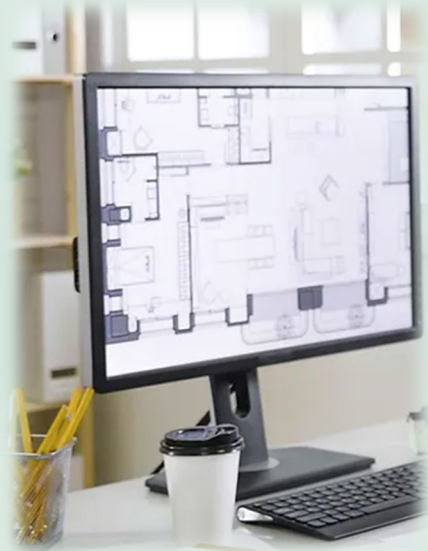

Phase 2:

After reviewing the concept plan with the client, a master plan will be created. The design's 3D digital images (5-15 images) are emailed to the client for approval.

- (25% is due during phase 2) This phase includes 2 stander revisions. (*EACH REVISION WILL CONSIST OF 30MIN ZOOM CALL)

*If you revise the design more than 2 times, the price will be adjusted *

PHASE 3:

After the design concept is finalized and approved, A site map with plant legends and botanical photos is also emailed to the customer.

- (During this final phase, we will need final payment to receive construction documents and plans). We will also send you a 3d video of your beautiful 3d landscape design.

Once rendering is completed, our L.A. Plants Landscaping team will generate an estimate and make your vision come to life!

This process will take between 3-6 weeks to finalize depending on the extended of projects design. You can follow us on [L.A. Plants Instagram](#) for weekly videos and before and after process. If you have any questions, please contact us at: info@loveyourgardens.net

Thank you,
